

Product Data Sheet

ADD-2285

GENERAL

ADD-2285 has been developed to give very strong defoaming in solventborne and radiation curing formulations. It also will act as a leveling agent, giving a smooth surface to the coating.

SPECIFICATIONS

Composition	: Modified polysiloxane containing fumed silica.
Active ingredients	: 100%
Solid content	: > 98%
Density @ 20 °C	: 0,95 – 1,0 g/cm ³
Appearance	: Colorless, slightly hazy liquid

APPLICATIONS AND USAGE

ADD-2285 can be incorporated prior to processing. If it is added subsequently, good distribution must be insured. **0,05 – 0,6%** on total formulation.

STORAGE, SAFETY & HANDLING

ADD-2285 should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 5 years from the date of manufacture. **ADD-2285** should be handled in accordance with good industrial practice. Detailed information can be found in the Safety Data Sheet.
