

Product Data Sheet

ADD-2522

GENERAL

ADD-2522 is a high performance liquid silicone defoamer for aqueous coating and ink formulations. **ADD-2522** has been developed especially for water-based ink, coatings & varnishes used for food packaging applications. **ADD-2522** fulfill the Swiss Ordinance requirements, all ingredients used are listed in Part A of Annex 6.

SPECIFICATIONS

Composition	: Silicone emulsion in water containing hydrophobic silica
Appearance	: Opaque, off-white liquid
Solid content	: 32%

APPLICATIONS AND USAGE

Water based inks, varnishes & coatings especially those used for food packaging applications. Architectural paints.

ADD-2522 can be incorporated prior to processing. If it is added subsequently, good distribution must be insured **0.5 - 1.0%** on total formulation. **ADD-2522** should be mixed thoroughly before use to ensure uniformity in application.

STORAGE, SAFETY & HANDLING

ADD-2522 should be stored in a cool dry place. **ADD-2522** should be handled in accordance with good industrial practice. Detailed information can be found in the Safety Data Sheet.
